TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
-------	--------	------	-------	--------------------	-----

PANEL 770644					
Amphetamines Screen, Urine	Positive.			Cutoff=1000	CE
Barbiturates Screen, Urine	Negative			Cutoff= 200	CE
Benzodiazepines Screen, Urine	Negative			Cutoff= 300	CE
Cannabinoids Screen, Urine	Positive.			Cutoff= 50	CE
Cocaine (Metab.) Screen, Urine	Negative			Cutoff= 300	CE
Opiates Screen, Urine	Positive.			Cutoff= 300	CE
Phencyclidine Screen, Urine	Negative			Cutoff= 25	CE
Methadone Screen, Urine	Negative			Cutoff= 300	CE

Drug Screen Comment:
 This assay provides a preliminary unconfirmed analytical test result that may be suitable for the clinical management of patients in certain situations. For workplace drug testing programs, preliminary positive findings should always be confirmed by an alternative method. Some over-the-counter medications, as well as adulterants, may cause inaccurate results. Screen Only testing does not meet the College of American Pathologists Forensic Urine Drug Testing Program requirements as a forensic urine drug test for workplace testing. All clients must ensure that their testing program conforms to applicable state and federal laws and employment agreements.

Specimen specific gravity is abnormally low, which may be a result of diet, disease or an effort to defeat the drug test. If this report is a "positive" result no follow-up is necessary. If this report is a "negative" or "none detected" result, Aegis recommends a less than two hour notice escorted or observed re-collection for re-testing the donor, or contacting Aegis within 3 days from the date of this report to schedule a Dilute Specimen Test for this specimen.
