

May 7, 2007

Scott Fontaine
6146 S Cushman Avenue
Tacoma, WA 98408

Dear Scott:

Inclosed, please find documents that will assist with the information you requested.

In addition, there is an amount that we budget for drug testing, and the amount actually spent. We do not have the total for actual money spent for this academic year yet, but the rest of the information is as follows:

	Budget	Actual
2006-07	\$122,890	
2005-06	\$125,390	119,478
2004-05	\$125,390	120,363

Also, the company that administers the drug tests is Aegis Science Corporation.

I hope this answers your questions. If you need anything else, please let us know.

Sincerely,

A handwritten signature in blue ink, appearing to be "SMcClain", written over a horizontal line.

Steve McClain
Asst. AD for Sports Information

**UNIVERSITY OF FLORIDA
UNIVERSITY ATHLETIC ASSOCIATION
SUBSTANCE ABUSE PROGRAM
(EDUCATION AND TESTING)**

POLICY

The University Athletic Association (the UAA) is concerned about drug and alcohol abuse. The abuse of chemical substances (including diuretics and masking agents) is not permitted. This includes the misuse of prescription drugs, over-the-counter drugs, the use of androgenic anabolic steroids, the use of alcohol, the use of drugs that are not medically indicated, and the use of illegal drugs. These pose a serious threat to the growth, development and overall physical and mental well-being of our student-athletes.

The UAA is concerned that direct drug side effects (e.g., the drug may cause a heart attack if used during training) may cause serious injury to student-athletes and, in team sports, to their teammates and opponents. It is our philosophy and policy to help student-athletes to understand the significant risk of using illicit drugs, prescription medication, inappropriate use of over the counter drugs (e.g., medication should be taken as prescribed and directed), and nutritional supplements when participating in the University's athletic programs. The University Athletic Association is also concerned about overuse or abuse of alcohol. In order to address these concerns, the Substance Abuse Committee has been established. The University President appoints the Committee, and the purpose of this Committee is to:

1. provide substance abuse education; and,
2. establish, conduct, and oversee drug testing procedures.

PROBLEMATIC DRUG USE AND DRUG ABUSE

The University Athletic Association does not approve of, excuse, or condone the use and/or abuse of illegal drugs (e.g., marijuana, speed, LSD, barbiturates, cocaine, ecstasy, heroin, PCP, GHB, etc.) by student-athletes. The use of such drugs can (1) be harmful to the individual; (2) affect athletic performance; (3) negatively affect the performance of the team; and, (4) put the individual and members of the individual's team in danger. The use of drugs can, among other things, lead to problems in many areas of one's life: poor academic performance; poor athletic performance; relationship problems, etc. Some signs of problematic drug use include: lack of motivation (especially with marijuana), not going to class regularly, agitation or nervousness, short temper, difficulty with sleep, loss of appetite, violence, loss of friendships, decline in grades or athletic performance. Another sign of problematic drug use is the need to use the drug on a frequent or regular basis (e.g., using marijuana daily) and/or not being able to do without it. Such "addiction" may be due to physical reasons, psychological reasons, or both.

Student-athletes who abuse drugs often do not fit the stereotype of a “drug abuser” or “addict.” However, such student-athletes, even if not “addicted,” have likely experienced or will experience problems in their lives due to drug use. It is important for student-athletes to (1) know the signs of problematic drug use (see the list above) and (2) realize that the use of **any** illegal drug or the **abuse** of **any** drug is considered a violation of the UAA drug policy.

SUBSTANCE ABUSE EDUCATION

Education is the most valuable tool in the life long prevention of substance abuse. The University Athletic Association and the Substance Abuse Committee are committed to their responsibility in the area of education. Examples include:

1. Requiring a two credit course on drugs and alcohol to be completed by all scholarship student-athletes.
2. Arranging speakers and seminars for coaches and staff in order for them to be more familiar with areas of drug abuse, such as how to identify an abuser, how to help an abuser, and risks of drug abuse.
3. Programs provided for student-athletes, such as educational and motivational speakers that will provide the necessary information to enable student-athletes to make decisions that will enhance a healthy lifestyle.
4. Disseminating information and materials available from NCAA, campus, and community resources in the areas of drugs, including alcohol and tobacco, as well as materials related to general health, and well-being.
5. Providing opportunities for student-athletes to discuss health, legal, and ethical risks of alcohol and other drug use during freshman orientation and preseason meetings. Providing opportunities for review and input by the Student-Athlete Advisory Committee (SAAC).
6. Communicating with independent committees on campus dealing with substance abuse.

DRUG TESTING

This program is required of all student-athletes including scholarship/non-scholarship student-athletes and cheerleaders. All student-athletes are required to participate in the University Athletic Association drug testing program as long as they are associated with the University Athletic Association.

SUBSTANCE ABUSE COMMITTEE

The Substance Abuse Committee is responsible for implementing all of the drug testing policies. The Committee works together with the coaches, staff, and student-athletes to make any revisions to the policy.

The Substance Abuse Committee is appointed by the President of the University of Florida and is made up of University of Florida faculty and staff plus personnel from the University Athletic Association. The majority of voting members on the Committee must be from the university faculty and university staff. Terms of service and authority of the Committee are determined by the President of the University of Florida.

INITIAL DRUG TEST

Freshmen and transfer student-athletes will have one initial drug test (urinalysis) at their pre-participation physical that occurs during Summer "B" or early in the Fall semester. All incoming student-athletes will be informed by mail of this initial test. There will be no sanctions for a positive test except for required meetings with members of the Substance Abuse Committee and a counselor for education and evaluation. The counselor will decide when to release the student-athlete. Parents of the student-athlete will be notified.

DRUG TESTING PROCEDURE

Testing will be conducted throughout the year (in season, out-of-season). Testing will be done during Summer "A" and "B" for all enrolled scholarship and non-scholarship student-athletes.

1. Random individual test - student-athletes' names are computer generated and each receives a card, which requires him/her to be tested with the day and time noted on the card.
2. Team testing - a team may be immediately tested before or after a workout or practice without notice.
3. Testing for reasonable suspicion. A coach, trainer, or administrator may request an individual or team test with or without notice when there is reasonable suspicion.

Computer assisted systematic selection is used to generate the names of student-athletes to be tested. The Assistant Athletic Director/Sports Health completes the cards for each student-athlete and delivers them to the head coach or their designee to be distributed to the student-athletes (sample card on page 12).

The technology used for drug screening and confirmation is specified on each sample's report. The specimen is first analyzed for the presence of any of the drugs that are a part of the panels of drugs listed on page 15. Positive results are reported to the Assistant Athletics Director/Sports Health only after confirmation by Gas Chromatography/Mass Spectrometry.

Any urine sample with a specific gravity of less than 1.006 and/or a creatinine of less than or equal to 20 mg/dL will be subjected to a more sensitive screening and confirmation test to determine the presence of prohibited drugs.

The testing site is the North End Zone Touchdown Terrace. The site is open from 6:30 a.m. - 8:30 a.m. to allow reporting without interfering with classes or other scheduled activities. Each student-athlete must produce an adequate volume of urine to perform the test. All individuals taking prescribed or over-the-counter medications have the responsibility of notifying the crew chief at the testing site.

Failure to show up, being late, or not giving a sample, will be treated as a positive test result, and the individual may receive sanctions and penalties at the discretion of the Committee.

To ensure validity, each specimen will be obtained under direct observation by appropriately trained collection personnel or physician assistants. Security of the specimen (chain of custody) will be implemented from the moment the student-athlete signs in until final completion of analysis of the specimen at the laboratory. Positive results, whether they are positive urine tests or no-shows/no-voids, are communicated from the Assistant Athletic Director/Sports Health, to the Chair of the Substance Abuse Committee, the Substance Abuse Committee, and the Director of Athletics.

In cases where student-athletes are found to be using drugs or are in non-compliance with collection procedures, a letter will be sent notifying them of the specific problem and informing the student-athlete of a meeting with the members of the Substance Abuse Committee. Copies of the letter are sent to the head coach. In any and all cases, the individual must appear before representatives of the Substance Abuse Committee for the purpose of answering questions and presenting additional information. The student-athlete may request the presence of his/her Coach. After the meeting between the student-athlete and the Substance Abuse Committee members, the student-athlete will be placed in Phase I, II, III, or IV and notified of such by letter. In cases such as no-shows or no-voids, the Substance Abuse Committee members may or may not place the student-athlete in a Phase I, II, III, or IV. In any case, the Committee will require more frequent future testing.

A student-athlete that has a positive drug test for marijuana is put in Phase I if the level reaches 15 ng/mL. If a student-athlete has a positive test for marijuana at a level between 5-14 ng/mL, counseling and future testing will be required. In addition, the student-athlete's parents and head coach will be notified. Other sanctions may be applied by the Substance Abuse Committee for multiple tests at the 5-14 ng/mL. These sanctions may include doing research on dangers and problems with drug use, losing complimentary tickets, letterwinner awards, or being placed in Phase I. Sanction procedures are described in detail starting on page 6 as to Phases I, II, III, and IV. A chart summarizing the missed game penalties is on page 14.

A student-athlete with a positive test for any level of Ephedrine in their system must meet with the Substance Abuse Committee. The 50% loss of competition will not be applied unless the level of the test reaches 10,000 ng/mL.

DRUGS SUBJECT TO TESTING

The University Athletic Association program tests for substances on a list of banned-drug classes developed by the University Athletic Association and the NCAA. A list of drug

classes that are tested for by the UAA is found on page 15, and a detailed list is available upon request from the trainers, nutritionists, or the Chair of the Substance Abuse Committee. This list consists of substances generally believed to be performance enhancing and/or potentially harmful to the health and safety of the student-athlete. The drug classes specifically include stimulants (such as amphetamines, ecstasy, and cocaine), hallucinogenic (such as LSD), anabolic steroids (such as Anavar and Dianabol), diuretics, masking agents, marijuana, as well as any other drugs not prescribed for the student-athlete. The University Athletic Association tests for alcohol. The UAA also tests for some nutritional or herbal supplements (such as ephedrine). Any student-athlete who wishes to take a supplement not provided by the UAA, must have it approved, in writing, by the nutritionist. This will prevent student-athletes from accidentally ingesting any substance for which the UAA tests.

COUNSELING

Counseling is required for each student-athlete who has a positive drug test. Counseling, especially for drug related problems, is coordinated by the Chairman of the Substance Abuse Committee. Counseling continues until the counselor releases the student-athlete. Failure to attend could result in further loss of competitions. If continued counseling is recommended, various counseling options are available. Mental health professionals are utilized.

Under no circumstances will the counselor release information without prior consent of the student-athlete. The counselor only reports to the Substance Abuse Committee if the student-athlete does not attend the counseling sessions. Counseling is available to any student-athlete who feels it would be beneficial.

APPEAL PROCESS

If a student-athlete believes the facts on which the Substance Abuse Committee's decision is based are erroneous or that the sanction(s) (including coach imposed sanctions) should not be imposed, the student-athlete may file a written appeal with the Director of Athletics within 15 days after receipt of the letter from the Chair of the Committee notifying the student-athlete of the Committee's action. The appeal may include only new information not previously available, which might have changed the factual findings of the Committee or the sanction(s). The Director of Athletics will review the information submitted by the student-athlete. If the Director of Athletics believes a basis exists for the appeal, he may request the Committee to reconsider its sanction(s). The Director of Athletics shall make the final decision regarding the appeal and will notify the student-athlete in writing of the decision.

Important Note: In cases where a student-athlete is deemed to have a positive drug test and such test results in sanctions affecting his or her ability to compete, and the student-athlete is scheduled to engage in competition before a determination can be made by the Substance Abuse Committee or the conclusion of any appeal under the standard review and appeal procedures, the student-athlete will be suspended from that competition pending a final decision. Time permitting, the

student-athlete can request an expedited meeting of the Substance Abuse Committee and an expedited appeal to the Director of Athletics. The appeal must include any information, which might change the factual findings of the Committee or the sanction(s). By selecting the expedited process, the student-athlete waives the right to the standard review and appeal procedures. Under the expedited process, the Committee will meet, by telephone if not in person, and in consultation with the Director of Athletics will render a decision before the competition. If the Committee is unable to meet or the Director of Athletics cannot render a decision before the competition, the student-athlete will not be permitted to participate in the competition.

PENALTIES AND REQUIREMENTS WHEN FAILING TO PASS A DRUG TEST

The Substance Abuse Committee believes that it is in the best health interest of student-athletes to follow these policies and adhere to the rules outlined regarding drug use. However, in those cases where individuals engage in drug behaviors that violate the rules set forth, it is important that there is a clear understanding of the potential consequences. These are outlined in the following section, which describes procedures, which will be implemented when a student-athlete is placed in Phase I, II, III, or IV. **Please note that Phase I is for a first positive for marijuana at 15ng/mL level. The first positive for other drugs, with the exception of alcohol, will place the student-athlete in Phase II.** The chart on page 14 summarizes the penalties for positive tests. If a student-athlete has a positive marijuana test(s) between 5 and 14 ng/mL or a positive test for ephedrine below 10,000 ng/mL, there are sanctions applied, but they do not include missing competitions.

“A positive is a positive.” Defenses such as passive inhalation, being in the company of people who are smoking marijuana, or someone putting something in a drink will not be accepted by the Committee. It is not the role of the Substance Abuse Committee to determine how a substance entered a student-athlete’s system. If a student-athlete is positive for a prescription medicine, it will be considered a positive; unless, the student-athlete has a doctor’s prescription in his or her own name.

The Committee recommends to all student-athletes that they be careful of their association with people that are involved with drug use.

The Committee may recommend reduction of sanctions for the second or third positive for marijuana or first positive for other drugs or a combination of one or more positives. In such cases, the Committee would consider all relevant factors including the length of time between the first positive and subsequent positive test(s), the student’s response to the previous positive test(s), response and consistency in attending counseling, devotion to academics, and time given to Goodwill Gators. The Committee would consider reducing the sanctions only in cases where, in the Committee’s judgment, strict adherence to the guidelines would be unfair to the student-athlete and not consistent with the educational objectives of the Substance Abuse Program. Any reduction of sanctions must be approved by the Director of Athletics and the President of the University of Florida.

PHASE I RECOMMENDED GUIDELINES (First Positive for Marijuana – Marijuana test is positive at the 15 ng/mL level)

- A. The student-athlete meets with the Substance Abuse Committee, and if the positive test is upheld, the student-athlete is to be suspended immediately from competition.
 - 1. The length of the suspension is equal to 10% of the team's season competition schedule where the student-athlete represents the University of Florida (for the number of events, please see page 14). The suspended events will be the next consecutive events in the schedule. Post-season events are also included in the suspension (e.g., SEC Championships, NCAA Championships, Bowl Games, Post-Season Invitational events). Additional sanctions may be applied by the coach or the Committee. These may include not allowing a student-athlete to dress for a game, be in the team area, and/or attend a pregame meal.
- B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:
 - 1. Student-athlete and his/her parent or guardian;
 - 2. Head coach;
 - 3. Associate Athletic Director for that sport;
 - 4. University Counselor;
 - 5. Assistant Athletic Director for Sports Health; and,
 - 6. Director of Athletics.
- C. The student-athlete may be asked to appear before the members of the Substance Abuse Committee on additional occasions.
- D. **Counseling is mandatory and attendance will be monitored by the Substance Abuse Committee.** The student-athlete must attend a counseling session within two weeks of their meeting with the members of the Substance Abuse Committee (allowances will be made when there is a conflict with the University Calendar). If the student-athlete fails to attend this meeting or subsequent sessions, there can be an additional 10% game suspension assessed by the Substance Abuse Committee.
- E. Follow-up drug testing will be mandatory for a period of at least six months.
- F. If a team completes its competition schedule while a student-athlete is under Phase I sanctions, the student-athlete's suspension will be carried over into next season's competition. If an individual is positive during a red shirt year, the student suspension will begin during next season's competition (game suspension will not be applied during a red shirt season or during a medical hardship).

PHASE II RECOMMENDED GUIDELINES (second positive for Marijuana at the 15 ng/mL level or a first positive for any other drug excluding alcohol)

- A. The student-athlete meets with the Substance Abuse Committee, and if the positive test is upheld, the student-athlete is to be suspended immediately from competition.
 - 1. The length of the suspension is equal to 50% of the team's season competition schedule where the student-athlete represents the University of Florida. The suspended events will be the next consecutive events in the schedule. Post-season events are also included in the suspension (e.g., SEC Championships, NCAA Championships, Bowl Games, and Post-Season Invitational events). Additional sanctions may be applied by the coach. These include not allowing a student-athlete to dress for a game, be in the team area, and/or attend a pregame meal. A coach may also cut a player from the team after a second marijuana positive, with the approval of the Director of Athletics.
- B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:
 - 1. Student-athlete and his/her parents or guardian;
 - 2. Head coach;
 - 3. Associate Athletic Director for that sport;
 - 4. University Counselor;
 - 5. Assistant Athletic Director for Sports Health; and,
 - 6. Director of Athletics.
- C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.
- D. Counseling is mandatory and attendance will be monitored by the Substance Abuse Committee.
- E. Follow-up drug testing will be mandatory for a period of at least six months.
- F. If a team completes its competition schedule while a student-athlete is under Phase II sanctions, the student-athlete's suspension will be carried over into next season's competition. If an individual is positive during a red shirt year, the student suspension will begin during next season's competition (game suspension will not be applied during a red shirt season or during a medical hardship).

PLEASE NOTE: When a student-athlete is positive for the first time and the sample contains more than one drug, the more severe sanctions will be applied. When there are a number of positive tests for different drugs, it is the Committee's responsibility to determine in which phase to place the student-athlete.

PHASE III RECOMMENDED GUIDELINES (third positive for Marijuana 15 ng/mL or second positive for other drugs excluding alcohol)

- A. The student-athlete meets with the Substance Abuse Committee, and if the positive test is upheld, the student-athlete is to be suspended immediately from competition.
 - 1. The length of the suspension is equal to one calendar year from the finding of a positive drug test. The suspended events will be the next consecutive events in the schedule. Post-season events are also included in the suspension (e.g., SEC Championships, NCAA Championships, Bowl Games, Post-Season Invitational events).
 - 2. The student-athlete will be charged with the loss of one season of competition; a "red shirt" season or medical hardship cannot be used to substitute for the loss of the season of the competition. See note below.
- B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:
 - 1. Student-athlete and his/her parents or guardian;
 - 2. Head coach;
 - 3. Associate Athletic Director for that sport;
 - 4. University Counselor;
 - 5. Assistant Athletic Director for Sports Health; and,
 - 6. Director of Athletics.
- C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.
- D. Counseling is mandatory, and attendance will be monitored by the Substance Abuse Committee. An assessment will be made to determine the student-athlete's desire for additional treatment.
- E. Follow-up drug testing will be mandatory.
- F. If a team completes its competition schedule while a student-athlete is under Phase III sanctions; the student-athlete's suspension will be carried over into next season's competition. If an individual is positive during a red shirt year, the student's suspension will begin during next season's competition (game suspension will not be applied during a red shirt season or during a medical hardship).

PLEASE NOTE: The Substance Abuse Committee may reinstate the loss of a season after at least one year of good behavior (e.g., attending class, passing grades, negative drug tests).

PHASE IV RECOMMENDED GUIDELINES (fourth positive for Marijuana 15 ng/mL or third positive of other drugs excluding alcohol)

- A. The student-athlete is immediately suspended, and the University Athletic Association revokes all privileges of participating in athletic activities or of using Athletic Association facilities.
- B. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the recommended plan and sanctions:
 - 1. Student-athlete and his/her parents or guardian;
 - 2. Head coach;
 - 3. Associate Athletic Director for that sport;
 - 4. University Counselor;
 - 5. Assistant Athletic Director for Sports Health; and,
 - 6. Director of Athletics.
- C. The student-athlete must appear before the Substance Abuse Committee on additional occasions as requested.
- D. Follow-up drug testing may be mandatory.
- E. Evaluation for further services will be conducted by the Substance Abuse Committee. Further counseling and/or treatment sessions may be required for the student-athlete on an individual basis, including the possibility of inpatient treatment.
 - 1. The offer to coordinate inpatient or outpatient treatment will be extended to the student-athlete under the clinical supervision of the UAA. "Clinical supervision" means, that in some cases, an alternative treatment is preferable to or needs to precede inpatient treatment. In these cases, the treatment is supervised by appropriate UAA medical or mental health professionals.
- F. The Director of Athletics will determine if athletic aid will be continued or not in accord with the terms of the financial aid agreement between the student-athlete and the University and in accordance with University and NCAA rules and regulations.

ALCOHOL ABUSE STATEMENT

The University Athletic Association does not condone the use or abuse of alcohol by student-athletes, nor does it permit underage drinking. Alcohol, including beer and wine, is clearly the nation's most common drug of abuse. Some of the signs of alcohol abuse include missed classes, driving while intoxicated, changing friends since drinking started, memory loss, drinking more than their friends, drinking alone, and drinking until the bottle is empty. Another sign of a drinking problem is students who must drink on a regular basis

(every weekend). Alcohol related problems of concern are violence, public drunkenness, sexual harassment/abuse, and decline in academic performance. Individuals involved in incidents such as an arrest for DUI or drunk and disorderly conduct will be referred to the Substance Abuse Committee. Upon meeting with the Committee, the student-athlete may be required to attend counseling. Failure to comply with the counseling requirement may result in stricter sanctions. Being underage or having two alcohol positives may result in stricter sanctions, including missing competition(s).

ALCOHOL ABUSE POLICY

The UAA Drug Testing Program includes testing for the presence of alcohol. Should a student-athlete test positive:

- A. The Chair of the Substance Abuse Committee will notify the following individuals in writing of the positive test:
 - 1. Student-athlete and his/her parents or guardian;
 - 2. Head coach;
 - 3. Associate Athletic Director for that sport;
 - 4. Substance Abuse Committee; and,
 - 5. Director of Athletics.
- B. The student-athlete must appear before the Substance Abuse Committee.
- C. Follow-up drug testing will be mandatory.
- D. Counseling will be required. If the student-athlete does not attend within two weeks, the Committee may require stricter sanctions.
- E. Should the outcome of the evaluation of the student-athlete identify an alcohol problem or if there is a second positive for alcohol, it could result in a student-athlete missing competition. The Chair of the Substance Abuse Committee will notify the following of the recommended plan and actions:
 - 1. Student-athlete and his/her parents or guardian;
 - 2. Head coach;
 - 3. Associate Athletic Director for that sport;
 - 4. University Counselor;
 - 5. Assistant Athletic Director/Sports Health; and,
 - 6. Director of Athletics.

NCAA DRUG TESTING PROGRAM

All teams participating in NCAA championships and certified postseason football bowl games are subject to NCAA drug testing. Although, not all championship or bowl sites will be selected for drug testing every year.

All Division I sports programs will participate in the out-of-competition (year round) testing

program for anabolic agents, diuretics, peptide hormones and analogues, and urine manipulators. Information relative to drug testing can be found on the NCAA web page at [http://www2.ncaa.org/legislation and governance/eligibility and conduct/drug testing](http://www2.ncaa.org/legislation_and_governance/eligibility_and_conduct/drug_testing). If a student-athlete has tested "positive" for drugs by the NCAA, he/she must abide by the NCAA policy. The NCAA requires one calendar year minimum suspension. If a student-athlete transfers, the NCAA positive test result must be reported to the new school.

Please note that with all positive NCAA tests, a student-athlete loses one year of competition.

OTHER POSITIVE DRUG TESTS

Documentation of a "positive" drug test from a recognized National or International Sports Governing Body, will be considered as a "positive" drug test performed by our laboratory and will place the student-athlete in the appropriate phase. A positive drug test by the NCAA will also be treated as a positive drug test by the UAA. The NCAA sanction and the UAA sanction will be imposed at the same time. The more severe sanction of the two will be enforced.

UAA DRUG TESTING APPOINTMENT CARD

Be on time;

Failure to keep this appointment will be treated as a positive;

Bring a list of current medications;

Please do not void immediately before coming to the test;

A sufficient volume of urine must be donated to perform the test; and,

Banned drugs are listed in the UAA Substance Abuse Policies.

Please read the UAA drug policy for specific information.

**UNIVERSITY OF FLORIDA
UNIVERSITY ATHLETIC ASSOCIATION
SUBSTANCE ABUSE PROGRAM**

CONSENT FORM

I hereby acknowledge that I have received a copy of the "University Athletic Association's Substance Abuse Program" (effective 07/01/05). I have read, and I understand the principles and purpose of this program. I consent to participation in the University Athletic Association Substance Abuse Program. This participation includes the testing of my urine for drugs, alcohol, and/or other substances at various times during this period as set forth in the Substance Abuse Policies. There is no risk of bodily harm involved in the testing procedures.

I consent to the release of the results to the Director of Athletics, the Head Coach, the Associate Athletic Director for my sport, the Assistant Athletic Director/Sports Health, the Substance Abuse Committee, and my parent(s) or guardian(s). I realize that if I am under age 18, a copy of this consent will be sent to my parent(s) or guardian(s) for their signature along with a copy of the Substance Abuse Program.
