

**DRUG TESTING
RECORDS**

JANUARY 2004

Fresno State
Department of Intercollegiate Athletics
Student-Athlete Assistance Program
Substance Abuse Program
2003-2004 Policy

The mission of the Department of Athletics at Fresno State is to offer every student-athlete a quality athletic experience. This includes providing each student-athlete with the opportunity to enhance their intellectual, physical, personal and social development within a competitive sport environment. The use of drugs is inconsistent with this mission, and may create a serious risk to the health and safety of all student-athletes.

One of the goals of the Student-Athlete Assistance Program (SAAP) is to offer assistance to athletes concerning issues related to alcohol and drug abuse. Preventative measures used by the Athletic Department include drug screening combined with an alcohol and drug education program. Fresno State does not condone either the use of drugs or the inappropriate use of alcohol.

The Athletic Department's definition of inappropriate use of alcohol by student-athletes includes, but is not limited to, the following: underage drinking, drinking on road trips, consumption of alcohol prior to or during athletic practice or competition, public drunkenness, and driving under the influence (DUI).

The Athletic Department will use urine drug testing to help diagnose those student-athletes with drug abuse or chemical dependency problems. It is the policy of the Athletic Department to return to athletics those who are in compliance and to restrict from athletics those who are not.

I. EDUCATION AND SCREENING PROGRAM GOALS

- A. Educate student-athletes concerning the problems of substance and alcohol abuse.
- B. Provide reasonable safeguards to ensure the safety of every student-athlete who participates in athletic competition.
- C. Identify student-athletes who may be involved with substance or alcohol abuse.
- D. Encourage prompt education, counseling or treatment for student-athletes with substance or alcohol abuse problems.

II. PROGRAM IMPLEMENTATION

Any student-athlete participating or intending to participate in Fresno State athletics will be included in the program. At least once each year, a presentation will be made to each team outlining and reviewing the Department's program and policy regarding drug screening, its purpose and its implementation. Prior to competition each student will confirm in writing that she/he has received, read, and is willing to abide by the policy.

III. DRUG SCREENING

Currently the Athletic Department conducts tests for street drugs such as amphetamines, cannabinoids (substance contained in marijuana), cocaine and other controlled substances. In addition, the department also tests for anabolic steroids and other so-called performance-enhancing drugs. These drugs may be present in nutritional supplements, and regardless of the source, it will be considered a positive drug test. Current information on nutritional supplements banned by the NCAA is available at www.drugfreesport.com. The department may test for any drug listed on the NCAA list of banned drugs [Bylaw 31.2.3.1].

Periodically, changes may occur in the types and levels of drugs tested. The NCAA website at http://www1.ncaa.org/membership/ed_outreach/health-safety/drug_testing/index.html provides current information and levels of banned substances.

A. Testing Guidelines

1. Testing will be conducted through both announced and unannounced tests. At any time all student-athletes may be tested during their respective sport's season.
2. Sports are ranked into high risk and low risk based on previous testing experience.
 - High Risk – tested monthly through a 33% random percentage sample
 - Low Risk – tested once or twice each year through a 33% random sample
3. Routine testing is done randomly; selective testing may also be done.
4. Post-season drug testing will be conducted with each team that qualifies for post-season competition. Positive results will not count as a positive test in the SAAP program. Each coach recommends sanctions to the Athletic Director, who, through consultation with the team physician, determines consequences and whether to travel the student.

5. Fifth-year athletes (those whose eligibility is exhausted) receiving any form of athletic scholarship must comply with all elements of the program.
6. Refusal by a student-athlete to take a drug test at the time it is requested will be treated as a positive test.
7. The presence of any known masking agents in urine shall be considered a positive test.
8. Starting with the fall 2003 semester, all student-athletes with previous positive drug tests will be considered to have one positive test.

B. Testing Procedures

1. Student-athletes will be asked to report directly to the testing area and will be required to remain until the collection is completed.
2. Collection will be done under the direct supervision of an Athletic Training or Student-Athlete Services staff member.
3. The student-athlete will transfer collection from a collection cup to a lab specimen container and then seal it before giving it to the staff member.
4. The student-athlete will sign a ledger acknowledging an assigned code number that will correspond to the number on the specimen container.
5. Specimens are collected by staff in the North Gym or Duncan Building training rooms. After the specimen is sealed by the athlete, it will be secured in a refrigerator. A member of the Athletic Department will place the specimen in a sealed pouch for mailing or deliverance to a courier. Specimens will be handled consistent with currently acceptable medical standards for biological specimens.
6. Testing protocol may vary based on the testing laboratory's guidelines.

IV. DISPOSITION OF THE RESULTS

A. Positive Tests

1. The positive test results will be given to the team physician who will notify the Athletic Director and the SAAP Coordinator.
2. Along with the positive test results, the team physician will include a recommendation regarding the athlete's participation in practice and/or

competition to the Athletic Director. If tests indicate a potential medical risk because of the substance involved, the team physician will recommend to temporarily suspend the student-athlete until such time as there is no medical risk. The Athletic Director will make the final decision.

3. The SAAP Coordinator will inform the student-athlete, Director of Sports Medicine, coach, and sport supervisor immediately of the positive test result.
4. The SAAP Coordinator, Director of Sports Medicine, and/or team physician will interview the student-athlete prior to competition. The head coach or an assistant coach will be invited to the meeting.

B. Assessment

1. Following the first positive drug test, an appointment for a chemical dependency assessment will be made with the treatment administrator.
2. The student-athlete has 14 consecutive days to follow through with completing the assessment. If the student-athlete fails to do this, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 10% of the total contests for that season, excluding post-season play.
3. The treatment administrator recommends a plan for the appropriate program for the student-athlete, based on the information contained in the assessment.
4. The plan is shared with the SAAP Coordinator and the team physician.
5. The student-athlete will meet for a post-assessment interview with the SAAP Coordinator, Director of Sports Medicine and coach to discuss the specific plan. The student-athlete will be drug tested at least monthly.

V. EDUCATION, TREATMENT AND AFTERCARE PROGRAM

A. Education Program

1. The education program usually consists of a computer program and/or a series of 12 Step meetings which focus on education as a means to prevent future drug use. If the student-athlete fails to complete the education program within five (5) weeks of the post-assessment interview, it is considered a second positive drug test, and the student will be

suspended (i.e., will not play) in 10% of the total contests for that season, excluding post-season play.

2. Coaches may also impose their own consequences following the first Positive drug test only. Consequences which include restrictions on playing time or scholarships require the concurrence of the Athletic Director.

B. Treatment Program

Treatment is available only upon the written request of the student-athlete or head coach. Requests will be made to the SAAP Coordinator. The treatment program usually consists of, at a minimum, a 12-week program designed to use a variety of techniques as a means to accomplish secondary prevention success.

1. The treatment administrator will report progress and consult with the team physician and the SAAP Coordinator.
2. Any violation of the treatment program (including a positive test, failure to attend counseling sessions and/or educational classes as scheduled, not completing outside assignments e.g., attending 12 Step meetings in the community) will be reported to the Athletic Director.
3. Decisions regarding the student-athletes' ability to continue to practice and/or compete are contingent on the confidential recommendations from the treatment administrator with input from the team physician, consultation with the head coach and the approval of the Athletic Director. During treatment student-athletes may be required to:
 - a) Submit to (at least) weekly drug testing as required by the treatment facility.
 - b) Sign a comprehensive contract (treatment plan) that stipulates conditions for eligibility for competition and/or practice.

C. Aftercare

Upon completion of treatment, student-athletes will enter the aftercare phase, which may last 3 to 6 months, and will again be tested for drugs.

VI. NON-COMPLIANCE

Compliance at each stage is the responsibility of the student-athlete. Non-compliance can occur through failure to follow the requirements at any of these stages: drug testing, assessment, education or treatment, and aftercare. Positive drug tests are cumulative throughout an athlete's entire career at Fresno State. However, after one tested year of non-positive results, one positive will be eliminated.

- A. The second positive drug test will result in suspension (i.e., will not play) in 10% of the total contests for that season, excluding post-season play. The suspension starts immediately following the positive and continues until 10% of contests have been played.
- B. The third positive drug test will result in suspension in 30% of the total contests for that season, excluding post-season play. The suspension starts immediately following the positive and continues until 30% of contests have been played.
- C. Consequences of a fourth positive drug test parallel those of the NCAA: student-athletes will be suspended for one calendar year, cannot practice or compete, and they will lose one year of eligibility. Prior to regaining athletic eligibility, student-athletes must complete an assessment and pass a drug test.

When positive tests which result in loss of playing time occur toward the end of the sport season, the suspension will continue into the next sport season until the percentage of playing time loss is fulfilled. The student-athlete may petition to the Athletic Director to determine if the suspension rules should be deferred or if alternate consequences are preferred.

VII. VOLUNTARY AND OTHER REFERRALS

- A. A student-athlete who comes forward voluntarily (or is referred by other means) and acknowledges a problem with drug abuse shall be afforded the support and resources available to address the problem. The student-athlete will undergo a chemical dependency assessment, as scheduled by the SAAP Coordinator. The student-athlete will be tested at least monthly. A self-referral at the point or moment of testing is not considered voluntary.
- B. The referral, assessment, diagnosis and treatment resources of the SAAP program are available to all coaches and student-athletes to assist with current and pre-existing conditions and circumstances. These circumstances include, but are not limited to, alcohol/drug abuse and antisocial behavior.

VIII. STUDENT-ATHLETES' RIGHTS

- A. At any time the student-athlete has the right to be assisted and/or represented by a person of his or her choice, but it may not be an attorney.
- B. Student-athletes may voluntarily contact the SAAP Coordinator, Director of Sports Medicine, team physician or sport supervisor at any time for personal, emotional or drug-related problems so that solutions may be found before their academic or athletic performance is affected. Any such concerns will be kept strictly confidential.
- C. Approval for a second opinion regarding a student-athlete's assessment may be granted with pre-approval of the SAAP Coordinator and team physician. Payment for the second assessment will be the responsibility of the student-athlete.
- D. Each student-athlete has the right to an appeal. An appeals committee consisting of members of the Student-Athlete Code of Conduct panel is available to hear appeals brought forth by the student-athlete, coach or Athletic Director to determine if the suspension rules should be deferred or if alternate consequences are preferred.

IX. COACHES' ROLE

It is the responsibility of the head coach to ensure that their student-athletes follow through with all responsibilities regarding the testing and education provided by the SAAP program.

Each head coach may also have team rules regarding alcohol and drug use that are separate from the NCAA or SAAP rules. Coaches have the right to determine the consequences for non-compliance with team rules if they become aware of non-compliance through their own means. However, coaches may not impose their own consequences for any positive SAAP tests except the first positive.

X. VIOLATION OF STATE OR FEDERAL LAW

Any criminal violation of state or federal laws involving the possession or sale of any drugs or illegal substances by student-athletes will be dealt with using the procedures outlined in the Student-Athlete Code of Conduct.

Number of Students

2005-06 = 17 (19 including medicals)

2004-05 = ~~17~~ 18 (9 including non-policy)

2003-04 = 11 (5 in Spring from Jan. 1.04)

Fresno State
Department of Athletics

Student-Athlete Assistance Program
Drug Testing Report

Year	# Tests	# Positives	# Students	% Positives/Tests	% Students/Tests
2000-01		Data not available	Data not available	Data not available	Data not available
2001-02		Data not available	Data not available	Data not available	Data not available
2003-04	341	15	11	4%	3%

NOTE

Testing policies changed: in 2002-03, random thirds of teams were tested 3 times (both in and out of season), and in 2003-04, random samples of 33% of team members were tested in season only. During both academic years, students with positive results were repeatedly tested at least every 30 days, and those in treatment were tested frequently as part of their treatment plan.

DRUG TESTING RECORDS

FY 2004 - 2005

Fresno State
Department of Intercollegiate Athletics
Student-Athlete Assistance Program
Substance Abuse Program
2004-2005 Policy

The mission of the Department of Athletics at Fresno State is to offer every student-athlete a quality athletic experience. This includes providing each student-athlete with the opportunity to enhance their intellectual, physical, personal and social development within a competitive sport environment. The use of drugs is inconsistent with this mission, and may create a serious risk to the health and safety of all student-athletes.

One of the goals of the Student-Athlete Assistance Program (SAAP) is to offer assistance to athletes concerning issues related to alcohol and drug abuse. Preventative measures used by the Athletic Department include drug screening combined with an alcohol and drug education program. Fresno State does not condone either the use of drugs or the inappropriate use of alcohol.

The Athletic Department's definition of inappropriate use of alcohol by student-athletes includes, but is not limited to, the following: underage drinking, drinking on road trips, consumption of alcohol prior to or during athletic practice or competition, public drunkenness, and driving under the influence (DUI).

The Athletic Department will use urine drug testing to help diagnose those student-athletes with drug abuse or chemical dependency problems. It is the policy of the Athletic Department to return to athletics those who are in compliance and to restrict from athletics those who are not.

I. EDUCATION AND SCREENING PROGRAM GOALS

- A. Educate student-athletes concerning the problems of substance and alcohol abuse.
- B. Provide reasonable safeguards to ensure the safety of every student-athlete who participates in athletic competition.
- C. Identify student-athletes who may be involved with substance or alcohol abuse.
- D. Encourage prompt education, counseling or treatment for student-athletes with substance or alcohol abuse problems.

II. PROGRAM IMPLEMENTATION

Any student-athlete participating or intending to participate in Fresno State athletics will be included in the program. At least once each year, a presentation will be made to each team outlining and reviewing the Department's program and policy regarding drug screening, its purpose and its implementation. Prior to competition each student will confirm in writing that she/he has received, read, and is willing to abide by the policy.

III. DRUG SCREENING

Currently the Athletic Department conducts tests for street drugs such as amphetamines, cannabinoids (substance contained in marijuana), cocaine and other controlled substances. In addition, the department also tests for anabolic steroids and other so-called performance-enhancing drugs. These drugs may be present in nutritional supplements, and regardless of the source, it will be considered a positive drug test. Current information on nutritional supplements banned by the NCAA is available at www.drugfreesport.com. The department may test for any drug listed on the NCAA list of banned drugs [Bylaw 31.2.3.1].

Periodically, changes may occur in the types and levels of drugs tested. The NCAA website at http://www1.ncaa.org/membership/ed_outreach/health-safety/drug_testing/index.html provides current information and levels of banned substances.

A. Testing Guidelines

1. Testing will be conducted through both announced and unannounced tests. At any time all student-athletes may be tested during their respective sport's season. Coaches may also request SAAP drug testing, with SAAP policy consequences, outside of their sport season with the concurrence of the SAAP Coordinator, team physician and Athletic Director.
2. Sports are ranked into high risk and low risk based on previous testing experience.
 - High Risk – tested monthly through a 33% random percentage sample
 - Low Risk – tested once or twice each year through a 33% random sample
3. Routine testing is done randomly; selective testing may also be done.
4. Post-season drug testing will be conducted with each team that qualifies for post-season competition. Positive results will not count as a positive test in the SAAP program. Each coach recommends sanctions to the Athletic Director, who, through consultation with the team physician, determines consequences and whether to travel the student.

5. Fifth-year athletes (those whose eligibility is exhausted) receiving any form of athletic scholarship must comply with all elements of the program.
6. Refusal by a student-athlete to take a drug test at the time it is requested will be treated as a positive test.
7. The presence of any known masking agents in urine shall be considered a positive test.
8. Starting with the fall 2003 semester, all student-athletes with previous positive drug tests will be considered to have one positive test.

B. Testing Procedures

1. Student-athletes will be asked to report directly to the testing area and will be required to remain until the collection is completed.
2. Collection will be done under the direct supervision of an Athletic Training or Student-Athlete Services staff member.
3. The student-athlete will transfer collection from a collection cup to a lab specimen container and then seal it before giving it to the staff member.
4. The student-athlete will sign a ledger acknowledging an assigned code number that will correspond to the number on the specimen container.
5. Specimens are collected by staff in the North Gym or Duncan Building training rooms. After the specimen is sealed by the athlete, it will be secured in a refrigerator. A member of the Athletic Department will place the specimen in a sealed pouch for mailing or deliverance to a courier. Specimens will be handled consistent with currently acceptable medical standards for biological specimens.
6. Testing protocol may vary based on the testing laboratory's guidelines.

IV. DISPOSITION OF THE RESULTS

A. Positive Tests

1. The positive test results will be given to the team physician who will notify the Athletic Director and the SAAP Coordinator.
2. Along with the positive test results, the team physician will include a recommendation regarding the athlete's participation in practice and/or competition to the Athletic Director. If tests indicate a potential medical risk because of the substance involved, the team physician will recommend to

temporarily suspend the student-athlete until such time as there is no medical risk. The Athletic Director will make the final decision.

3. The SAAP Coordinator will inform the student-athlete, Director of Sports Medicine, coach, and sport supervisor immediately of the positive test result.
4. The SAAP Coordinator, Director of Sports Medicine, and/or team physician will interview the student-athlete prior to competition. The head coach or an assistant coach will be invited to the meeting.

B. Assessment

1. Following the first positive drug test, an appointment for a chemical dependency assessment will be made with the treatment administrator.
2. The student-athlete has 14 consecutive days to follow through with completing the assessment. If the student-athlete fails to do this, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 10% of the total contests for that season, excluding post-season play.
3. The treatment administrator recommends a plan for the appropriate program for the student-athlete, based on the information contained in the assessment.
4. The plan is shared with the SAAP Coordinator and the team physician.
5. The student-athlete will meet for a post-assessment interview with the SAAP Coordinator, Director of Sports Medicine and coach to discuss the specific plan. The student-athlete will be drug tested at least monthly.

V. EDUCATION, TREATMENT AND AFTERCARE PROGRAM

All education, counseling, treatment and aftercare services with outside providers must have the prior approval of the SAAP Coordinator and team physician.

A. Education Program

1. The education program usually consists of a computer program and/or a series of 12 Step meetings which focus on education as a means to prevent future drug use. If the student-athlete fails to complete the education program within five (5) weeks of the post-assessment interview, it is considered a second positive drug test, and the student will be

suspended (i.e., will not play) in 10% of the total contests for that season, excluding post-season play.

2. Coaches may also impose their own consequences following the first Positive drug test only. Consequences which include restrictions on playing time or scholarships require the concurrence of the Athletic Director.

B. Treatment Program

Treatment is available only upon the written request of the student-athlete or head coach. Requests will be made to the SAAP Coordinator. The treatment program usually consists of, at a minimum, a 12-week program designed to use a variety of techniques as a means to accomplish secondary prevention success.

1. The treatment administrator will report progress and consult with the team physician and the SAAP Coordinator.
2. Any violation of the treatment program (including a positive test, failure to attend counseling sessions and/or educational classes as scheduled, not completing outside assignments e.g., attending 12 Step meetings in the community) will be reported to the Athletic Director.
3. Decisions regarding the student-athletes' ability to continue to practice and/or compete are contingent on the confidential recommendations from the treatment administrator with input from the team physician, consultation with the head coach and the approval of the Athletic Director. During treatment student-athletes may be required to:
 - a) Submit to (at least) weekly drug testing as required by the treatment facility.
 - b) Sign a comprehensive contract (treatment plan) that stipulates conditions for eligibility for competition and/or practice.

C. Aftercare

Upon completion of treatment, student-athletes will enter the aftercare phase, which may last 3 to 6 months, and will again be tested for drugs.

VI. NON-COMPLIANCE

Compliance at each stage is the responsibility of the student-athlete. Non-compliance can occur through failure to follow the requirements at any of these stages: drug testing, assessment, education or treatment, and aftercare. Positive drug tests are

cumulative throughout an athlete's entire career at Fresno State. However, after one tested year of non-positive results, one positive will be eliminated.

- A. The second positive drug test will result in suspension (i.e., will not play) in 10% of the total contests for that season, excluding post-season play. The suspension starts immediately following the positive and continues until 10% of contests have been played.
- B. The third positive drug test will result in suspension in 30% of the total contests for that season, excluding post-season play. The suspension starts immediately following the positive and continues until 30% of contests have been played.
- C. Consequences of a fourth positive drug test parallel those of the NCAA: student-athletes will be suspended for one calendar year, cannot practice or compete, and they will lose one year of eligibility. Prior to regaining athletic eligibility, student-athletes must complete an assessment and pass a drug test.

When positive tests which result in loss of playing time occur toward the end of the sport season, the suspension will continue into the next sport season until the percentage of playing time loss is fulfilled. The student-athlete may petition to the Athletic Director to determine if the suspension rules should be deferred or if alternate consequences are preferred.

VII. VOLUNTARY AND OTHER REFERRALS

- A. A student-athlete who comes forward voluntarily (or is referred by other means) and acknowledges a problem with drug abuse shall be afforded the support and resources available to address the problem. The student-athlete will undergo a chemical dependency assessment, as scheduled by the SAAP Coordinator. The student-athlete will be tested at least monthly. A self-referral at the point or moment of testing **is not** considered voluntary.
- B. The referral, assessment, diagnosis and treatment resources of the SAAP program are available to all coaches and student-athletes to assist with current and pre-existing conditions and circumstances. These circumstances include, but are not limited to, alcohol/drug abuse and antisocial behavior.

VIII. STUDENT-ATHLETES' RIGHTS

- A. At any time the student-athlete has the right to be assisted and/or represented by a person of his or her choice, but it may not be an attorney.
- B. Student-athletes may voluntarily contact the SAAP Coordinator, Director of Sports Medicine, team physician or sport supervisor at any time for personal,

emotional or drug-related problems so that solutions may be found before their academic or athletic performance is affected. Any such concerns will be kept strictly confidential.

- C. Approval for a second opinion regarding a student-athlete's assessment may be granted with pre-approval of the SAAP Coordinator and team physician. Payment for the second assessment will be the responsibility of the student-athlete.

- D. Each student-athlete has the right to an appeal. An appeals committee consisting of members of the Student-Athlete Code of Conduct panel is available to hear appeals brought forth by the student-athlete, coach or Athletic Director to determine if the suspension rules should be deferred or if alternate consequences are preferred.

IX. COACHES' ROLE

It is the responsibility of the head coach to ensure that their student-athletes follow through with all responsibilities regarding the testing and education provided by the SAAP program.

Coaches may request drug testing outside of their sport season, which has no SAAP policy consequences, with the concurrence of the SAAP Coordinator, team physician and Athletic Director; any such testing will be paid for by the Athletic Department.

Each head coach may also have team rules regarding alcohol and drug use that are separate from the NCAA or SAAP rules. Coaches have the right to determine the consequences for non-compliance with team rules if they become aware of non-compliance through their own means. However, coaches may not impose their own consequences for any positive SAAP tests except the first positive.

X. VIOLATION OF STATE OR FEDERAL LAW

Any criminal violation of state or federal laws involving the possession or sale of any drugs or illegal substances by student-athletes will be dealt with using the procedures outlined in the Student-Athlete Code of Conduct.

Sport _____

**FRESNO STATE
DEPARTMENT OF INTERCOLLEGIATE ATHLETICS
CONSENT TO PARTICIPATE IN THE
SUBSTANCE ABUSE PROGRAM
AND LIMITED WAIVER OF CONFIDENTIALITY**

I, _____, a student of California State University, Fresno, as a condition to participating in the Intercollegiate Athletic program conducted under the auspices to the California State University, Fresno Athletic Corporation, Inc., do hereby consent to participate in the Substance Abuse Program (hereafter "Program"). I acknowledge that I have received, read and understand the policy statement concerning this Program which includes provisions for testing for the presence of substances and for education and counseling with regard to substance abuse, and disciplinary sanctions which might be imposed if it is determined that I have violated that provisions and intent of the Program. I hereby consent to having samples of my urine tested for the presence of those drugs or other substances identified in the Program at such times as urinalysis tests are required under the Program. I understand that I may choose not to sign this Form and forego participation in intercollegiate athletics at Fresno State.

Further, I understand that as a part of the Program, the results of this testing may be disclosed to the team physician, athletic director, the coaching staff, SAAP Coordinator, Director or Sports Medicine, sports supervisor, SAAP Committee members, and with proper consent, to my parent(s) or legal guardian(s) as provided for in the Program. I also understand that my participation in intercollegiate athletics is conditioned upon my full and good faith participation and cooperation in all aspects of the Program including testing and education and, upon request, counseling and rehabilitation.

To the extent that disclosures are necessary pursuant to the provisions of the Program, I further authorize the release of information under the Family Education and Privacy Act (20 U.S.C. Section 1232(g)), the physician-patient privilege, and any state laws or University policies. It is understood that the information will not be available to any other person without first obtaining my consent. I also hereby release the University, Athletic Corporation and all of their Trustees, Directors, officers, employees and agents from legal responsibility or liability for the release of such information and records as authorized by this Form.

SAAP Positives 2004-05

██████████ – 3 students with SAAP positives (2 now @ 10% suspensions for next year and 1 @ 30% suspension), 1 positive for alcohol @ .085 %, numerous positives and repeat positives for marijuana during non-SAAP testing, 2 positives for cocaine on non-SAAP testing, 2 referrals for anger management (██████████), numerous referrals from ██████████ for fighting

██████████ – 3 positives (1 now in noncompliance = 10% suspension next year but may not be allowed to return to team)

██████████ – 1 positive, 1 self-disclosure of marijuana use and 1 report of cocaine use

██████████ – 1 ████████-year student with 2 positives this year

██████████ – 1 positive for amphetamines (on prescription Adderal for ADD)

██████████ – 1 coach referral for alcohol abuse/domestic violence

██████████ – 1 report of steroid use (tested and results negative)

██████████ – 3 referrals from ██████████ for anger management (seeing ██████████)

██████████ – 1 positive for codeine (on prescription cough syrup), incidents of sexual harassment in the dorms resulted in special training for team on ██████████

DRUG TESTING RECORDS

FY 2005 - 2006

Fresno State
Department of Intercollegiate Athletics
Student-Athlete Assistance Program
Substance Abuse Program
2005-2006 Policy

The mission of the Department of Athletics at Fresno State is to offer every student-athlete a quality athletic experience. This includes providing each student-athlete with the opportunity to enhance their intellectual, physical, personal and social development within a competitive sport environment. The use of drugs is inconsistent with this mission, and may create a serious risk to the health and safety of all student-athletes.

One of the goals of the Student-Athlete Assistance Program (SAAP) is to offer assistance to athletes concerning issues related to alcohol and drug abuse. Preventative measures used by the Athletic Department include drug screening combined with an alcohol and drug education program. Fresno State does not condone either the use of drugs or the inappropriate use of alcohol.

The Athletic Department's definition of inappropriate use of alcohol by student-athletes includes, but is not limited to, the following: underage drinking, drinking on road trips, consumption of alcohol prior to or during athletic practice or competition, public drunkenness, and driving under the influence (DUI).

The Athletic Department will use urine drug testing to help diagnose those student-athletes with drug abuse or chemical dependency problems. It is the policy of the Athletic Department to return to athletics those who are in compliance and to restrict from athletics those who are not.

I. EDUCATION AND SCREENING PROGRAM GOALS

- A. Educate student-athletes concerning the problems of substance and alcohol abuse.
- B. Provide reasonable safeguards to ensure the safety of every student-athlete who participates in athletic competition.
- C. Identify student-athletes who may be involved with substance or alcohol abuse.
- D. Encourage prompt education, counseling or treatment for student-athletes with substance or alcohol abuse problems.

II. PROGRAM IMPLEMENTATION

Any student-athlete participating or intending to participate in Fresno State athletics will be included in the program. At least once each year, a presentation will be made to each team outlining and reviewing the Department's program and policy regarding drug screening, its purpose and its implementation. Prior to competition each student will confirm in writing that she/he has received, read, and is willing to abide by the policy.

III. DRUG SCREENING

Currently the Athletic Department conducts tests for street drugs such as amphetamines, cannabinoids (substance contained in marijuana), cocaine and other controlled substances. In addition, the department also tests for anabolic steroids and other so-called performance-enhancing drugs. These drugs may be present in nutritional supplements, and regardless of the source, it will be considered a positive drug test. Current information on nutritional supplements banned by the NCAA is available at www.drugfreesport.com. The department may test for any drug listed on the NCAA list of banned drugs [Bylaw 31.2.3.1].

Periodically, changes may occur in the types and levels of drugs tested. The NCAA website at http://www1.ncaa.org/membership/ed_outreach/health-safety/drug_testing/index.html provides current information and levels of banned substances.

A. Testing Guidelines

1. All SAAP testing will be conducted through unannounced tests (i.e., coaches and students will not know testing dates in advance). At any time all student-athletes may be tested during their respective sport's playing season. The playing (i.e., practice and competition) season for a particular sport is the period of time between the date of an institution's first officially recognized practice session and the date of the institution's last practice session or date of competition [Bylaw 17.1.1]. Coaches may also request SAAP drug testing, with SAAP policy consequences, outside of their playing season with the concurrence of the SAAP Coordinator, team physician and Athletic Director.
2. Sports are ranked into high risk and low risk based on previous testing experience.
 - High Risk – tested monthly through a 33% random percentage sample
 - Low Risk – tested once or twice each year through a 33% random sample
3. Routine testing is done randomly; selective testing may also be done.

4. Post-season drug testing will be conducted with each team that qualifies for post-season competition. Positive results will count as positive tests in the SAAP program. If the positive results do not require immediate suspension according to the SAAP policy, the team physician determines whether to travel the student.
5. Fifth-year athletes (those whose eligibility is exhausted) receiving any form of athletic scholarship must comply with all elements of the program.
6. Refusal by a student-athlete to take a drug test at the time it is requested will be treated as a positive test.
7. The presence of any known masking agents in urine shall be considered a positive test.
8. All student-athletes with a positive drug test(s) from the previous year will be considered to have one positive test at the beginning of the next academic year. However, after one tested year of non-positive results, one positive will be eliminated.

Testing Procedures

1. Student-athletes will be asked to report directly to the testing area and will be required to remain until the collection is completed.
2. Collection will be done under the direct supervision of an Athletic Training or Student-Athlete Services staff member.
3. The student-athlete will transfer collection from a collection cup to a lab specimen container and then seal it before giving it to the staff member.
4. The student-athlete will sign a ledger acknowledging an assigned code number that will correspond to the number on the specimen container.
5. Specimens are collected by staff in the North Gym or Duncan Building training rooms. After the specimen is sealed by the athlete, it will be secured in a refrigerator. A member of the Athletic Department will place the specimen in a sealed pouch for mailing or deliverance to a courier. Specimens will be handled consistent with currently acceptable medical standards for biological specimens.
6. Testing protocol may vary based on the testing laboratory's guidelines.

IV. DISPOSITION OF THE RESULTS

A. Positive Tests

1. The positive test results will be given to the team physician who will notify the Athletic Director and the SAAP Coordinator.
2. Along with the positive test results, the team physician will include a recommendation regarding the athlete's participation in practice and/or competition to the Athletic Director. If tests indicate a potential medical risk because of the substance involved, the team physician will recommend to temporarily suspend the student-athlete until such time as there is no medical risk. The Athletic Director will make the final decision.
3. The SAAP Coordinator will inform the student-athlete, Director of Sports Medicine, coach, and sport supervisor immediately of the positive test result.
4. The SAAP Coordinator, Director of Sports Medicine, and/or team physician will interview the student-athlete prior to competition during a pre-assessment meeting. The head coach or an assistant coach will be invited to the meeting.

B. Assessment

1. Following the first positive drug test, an appointment for a chemical dependency assessment will be made with the treatment administrator.
2. The student-athlete has 14 consecutive days to follow through with completing the assessment. If the student-athlete fails to do this, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 20% of the total contests for that season, including post-season play.
3. The treatment administrator recommends a plan for the appropriate program for the student-athlete, based on the information contained in the assessment.
4. The plan is shared with the SAAP Coordinator and the team physician.
5. The student-athlete may meet for a post-assessment interview with the SAAP Coordinator, Director of Sports Medicine and coach to discuss the specific plan. The student-athlete will be drug tested at least monthly during the playing season.

V. EDUCATION, TREATMENT AND AFTERCARE PROGRAM

All education, counseling, treatment and aftercare services with outside providers must have the prior approval of the SAAP Coordinator and team physician.

A. Education Program

1. The education program usually consists of a computer program and/or a series of 12 Step meetings which focus on education as a means to prevent future drug use. If the student-athlete fails to complete the education program within three (3) weeks of the post-assessment interview, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 20% of the total contests for that season, including post-season play.
2. Coaches may also impose their own consequences following the first positive drug test only. Consequences which include restrictions on playing time or scholarships require the concurrence of the Athletic Director.

B: Treatment Program

Treatment is available only upon the written request of the student-athlete or head coach. Requests will be made to the SAAP Coordinator. The treatment program usually consists of, at a minimum, a 12-week program designed to use a variety of techniques as a means to accomplish secondary prevention success.

1. The treatment administrator will report progress and consult with the team physician and the SAAP Coordinator.
2. Any violation of the treatment program (including a positive test, failure to attend counseling sessions and/or educational classes as scheduled, not completing outside assignments e.g., attending 12 Step meetings in the community) will be reported to the Athletic Director.
3. Decisions regarding the student-athletes' ability to continue to practice and/or compete are contingent on the confidential recommendations from the treatment administrator with input from the team physician, consultation with the head coach and the approval of the Athletic Director. During treatment student-athletes may be required to:
 - a) Submit to periodic drug testing as required by the treatment facility. Drug testing during treatment is not considered SAAP testing and does not have SAAP policy consequences.
 - b) Sign a comprehensive contract (treatment plan) that stipulates conditions for eligibility for competition and/or practice.

C. Aftercare

Upon completion of treatment, student-athletes will enter the aftercare phase, which may last 3 to 6 months, and will again be SAAP tested for drugs.

VI. NON-COMPLIANCE

Compliance at each stage is the responsibility of the student-athlete. Non-compliance can occur through failure to follow the requirements at any of these stages: drug testing, assessment, education or treatment, and aftercare. Positive drug tests are cumulative throughout each academic year.

- A. The first positive drug test will result in suspension (i.e., will not play) in 10% of the total contests for that season, including post-season play. The suspension starts immediately following the positive and continues until 10% of contests have been played. In lieu of the 10% suspension, students may choose to complete a drug education program within a 3-week period. Students must notify the SAAP Coordinator of their decision to complete drug education at the time of the pre-assessment meeting. Suspension is from competition only; students on suspension may continue to practice as long as there are no medical issues which indicate otherwise.
- B. The second positive drug test will result in suspension in 20% of the total contests for that season, including post-season play. The suspension starts immediately following the positive and continues until 20% of contests have been played. Suspension is from competition only; students on suspension may continue to practice as long as there are no medical issues which indicate otherwise.
- C. Consequences of a third positive drug test are similar to those of the NCAA in that student-athletes will be suspended for one calendar year and cannot compete. They also may not practice and may lose one year of eligibility. Prior to regaining athletic eligibility, student-athletes must complete an assessment and pass a drug test.

When positive tests which result in loss of playing time occur toward the end of the sport season, the suspension will continue into the next sport season until the percentage of playing time loss is fulfilled. The student-athlete may petition to the Athletic Director to determine if the suspension rules should be deferred or if alternate consequences are preferred.

VII. VOLUNTARY AND OTHER REFERRALS

- A. A student-athlete who comes forward voluntarily (or is referred by other means) and acknowledges a problem with drug abuse shall be afforded the support and resources available to address the problem. The student-athlete will undergo a chemical dependency assessment, as scheduled by the SAAP Coordinator. The student-athlete will be tested at least monthly. A self-referral at the point or moment of testing is not considered voluntary.

- B. The referral, assessment, diagnosis and treatment resources of the SAAP program are available to all coaches and student-athletes to assist with current and pre-existing conditions and circumstances. These circumstances include, but are not limited to, alcohol/drug abuse and antisocial behavior.

VIII. STUDENT-ATHLETES' RIGHTS

- A. At any time the student-athlete has the right to be assisted and/or represented by a person of his or her choice, but it may not be an attorney.
- B. Student-athletes may voluntarily contact the SAAP Coordinator, Director of Sports Medicine, team physician or sport supervisor at any time for personal, emotional or drug-related problems so that solutions may be found before their academic or athletic performance is affected. Any such concerns will be kept strictly confidential.
- C. Approval for a second opinion regarding a student-athlete's assessment may be granted with pre-approval of the SAAP Coordinator and team physician. Payment for the second assessment will be the responsibility of the student-athlete.
- D. Each student-athlete has the right to an appeal. An appeals committee consisting of members of the Student-Athlete Code of Conduct panel is available to hear appeals brought forth by the student-athlete, coach or Athletic Director to determine if the suspension rules should be deferred or if alternate consequences are preferred.

IX. COACHES' ROLE

It is the responsibility of the head coach to ensure that their student-athletes follow through with all responsibilities regarding the testing and education provided by the SAAP program.

Coaches may request non-SAAP drug testing (i.e., drug tests without SAAP consequences) twice during an academic year – once in their pre-season and once in their post-season playing period. Coaches must notify the SAAP Coordinator two weeks in advance of when they want the non-SAAP testing to occur. Additional non-SAAP testing may be conducted under extraordinary circumstances upon the concurrence of the SAAP Coordinator, team physician and Athletic Director. All SAAP and non-SAAP drug testing will be paid for by the Athletic Department.

Exceptions to the pre-season time period for non-SAAP testing may be made for the fall sports of Cross Country, Football, Soccer, and Volleyball since their playing seasons begin when students arrive on campus. Any exceptions require the concurrence of the SAAP Coordinator, team physician and Athletic Director.

Any students testing positive on a non-SAAP test for a second time must be referred to the SAAP Program. All drug testing which occurs within a sport's playing season will be considered SAAP testing and will have SAAP consequences.

Any students whose non-SAAP test results indicate a potential medical risk must be immediately referred to the SAAP Program for assessment and fitness to participate. Medical risk is indicated by positives from substances such as heroine, ecstasy, cocaine, amphetamine, PCP, pain kills and other narcotics. If the test were performed for anti-social behavior, referral for assessment is recommended.

Each head coach may also have team rules regarding alcohol and drug use that are separate from the NCAA or SAAP rules. Coaches have the right to determine the consequences for non-compliance with team rules if they become aware of non-compliance through their own means. However, coaches may not impose their own consequences for any positive SAAP tests except the first positive.

X. VIOLATION OF STATE OR FEDERAL LAW

Any criminal violation of state or federal laws involving the possession or sale of any drugs or illegal substances by student-athletes will be dealt with using the procedures outlined in the Student-Athlete Code of Conduct.

Sport _____

**FRESNO STATE
DEPARTMENT OF INTERCOLLEGIATE ATHLETICS
CONSENT TO PARTICIPATE IN THE
SUBSTANCE ABUSE PROGRAM
AND LIMITED WAIVER OF CONFIDENTIALITY**

I, _____, a student of California State University, Fresno, as a condition to participating in the Intercollegiate Athletic program conducted under the auspices to the California State University, Fresno Athletic Corporation, Inc., do hereby consent to participate in the Substance Abuse Program (hereafter "Program"). I acknowledge that I have received, read and understand the policy statement concerning this Program which includes provisions for testing for the presence of substances and for education and counseling with regard to substance abuse, and disciplinary sanctions which might be imposed if it is determined that I have violated that provisions and intent of the Program. I hereby consent to having samples of my urine tested for the presence of those drugs or other substances identified in the Program at such times as urinalysis tests are required under the Program. I understand that I may choose not to sign this Form and forego participation in intercollegiate athletics at Fresno State.

Further, I understand that as a part of the Program, the results of this testing may be disclosed to the team physician, athletic director, the coaching staff, SAAP Coordinator, Director or Sports Medicine, sports supervisor, SAAP Committee members, and with proper consent, to my parent(s) or legal guardian(s) as provided for in the Program. I also understand that my participation in intercollegiate athletics is conditioned upon my full and good faith participation and cooperation in all aspects of the Program including testing and education and, upon request, counseling and rehabilitation.

To the extent that disclosures are necessary pursuant to the provisions of the Program, I further authorize the release of information under the Family Education and Privacy Act (20 U.S.C. Section 1232(g)), the physician-patient privilege, and any state laws or University policies. It is understood that the information will not be available to any other person without first obtaining my consent. I also hereby release the University, Athletic Corporation and all of their Trustees, Directors, officers, employees and agents from legal responsibility or liability for the release of such information and records as authorized by this Form.

MEMORANDUM

TO: Desiree Reed-Francois
Assoc. Athletics Director

FROM: Linda Gannaway *Linda*
SAAP Coordinator

RE: 2005-06 SAAP Testing Dates

Attached are the SAAP drug testing dates for the 2005-06 academic year, which are in keeping with our SAAP policy regarding high-risk and low-risk sports.

All SAAP testing this year will be unannounced (i.e., coaches and students will not know testing dates in advance). Therefore, these dates are confidential and are only being shared with those with a need to know. Staff receiving copies are indicated below. Miguel will only share selected testing dates with the athletic trainers who will be responsible for administering the tests to those specific sports.

Thanks in advance for your support in identifying random students from each team to participate in our testing program.

2005-06 SAAP Summary

NOTE: All positives are for marijuana unless otherwise indicated.

[REDACTED]

Positives from 2004-05:

[REDACTED] (30% carry-over suspension); did not return to team

[REDACTED] (10% carry-over suspension); [REDACTED]

[REDACTED] (10% carry-over suspension); [REDACTED]

New Positives:

1 [REDACTED] – first positive on Sept. 20

2 [REDACTED] – first positive on Sept. 20

3 [REDACTED] – first positive on Oct. 16

4 [REDACTED] – first positive on Nov. 22; second positive on Dec. 19

5 [REDACTED] – second positive (first this year) on Nov. 22 (20% suspension waived);
extremely dilute sample on Dec. 19 [REDACTED]

6 [REDACTED] – second positive (first this year) on Nov. 22 (20% suspension waived)

7 [REDACTED] – first positive on Dec. 19

8 [REDACTED] – first positive on Dec. 19

9 [REDACTED] – first positive on Dec. 19

10 [REDACTED] – positive for codeine on Dec. 19; not a SAAP strike since it was
prescribed following [REDACTED]

[REDACTED]

Positives from 2004-05:

[REDACTED] – quit team in [REDACTED]

[REDACTED] – quit team in [REDACTED]

[REDACTED] (10% carry-over suspension; no grounds for appeal; missed 1.6 competitions);

New Positives:

11 [REDACTED] – positive on non-SAAP test on Aug. 31 (suspended from competition
by Coach and AD for [REDACTED]; provided counseling; [REDACTED])

12 [REDACTED] – positive on non-SAAP test on Aug. 31 (suspended from competition by Coach and AD for [REDACTED]; provided counseling; may not be academically eligible for [REDACTED] quit during [REDACTED])

13 [REDACTED] – positive for amphetamines on Dec. 14; reportedly taking over-the-counter cold medication, but since he didn't check with staff in advance and since he used it while at a [REDACTED] tournament (where it could have provided a competitive advantage), it is considered a SAAP strike

14 [REDACTED] – positive for marijuana on Dec. 14 (which constituted a 2nd SAAP strike – first positive this year = 20% suspension); moot – academically ineligible for the [REDACTED]

[REDACTED] – first positive on Jan. 23

Also:

[REDACTED] – [REDACTED]
[REDACTED] – [REDACTED]
[REDACTED] – [REDACTED]
[REDACTED] – [REDACTED]

[REDACTED]

15 [REDACTED] – positive on non-SAAP test on Oct. 19 (required to get an assessment); second positive (first SAAP positive) on Jan. 5

16 [REDACTED] – first positive on Jan. 25

[REDACTED]

17 [REDACTED] – first positive for amphetamines on Nov. 15; did not clear with trainers; it is a SAAP strike

18 [REDACTED] – first positive for tranquilizer on Nov. 15; prescribed for sleep for [REDACTED]; it will not count as a SAAP positive

[REDACTED]

19 [REDACTED] – first positive for codeine on Oct. 13; prescribed for [REDACTED]; does not count as a SAAP strike

[REDACTED]

[REDACTED] – [REDACTED]
[REDACTED] – [REDACTED]

DRUG TESTING RECORDS

FY 2006 - 2007

Fresno State Department of Athletics Substance Abuse Education and Testing Program

2006-2007 Policy

The mission of the Department of Athletics at Fresno State is to offer every student-athlete a quality athletic experience. This includes providing each student-athlete with the opportunity to enhance their intellectual, physical, personal and social development within a competitive sport environment. The use of drugs is inconsistent with this mission, and may create a serious risk to the health and safety of all student-athletes.

The primary goal of the Substance Abuse Education and Testing Program (hereafter "Substance Program") is to help student-athletes abstain from drug use and inappropriate alcohol use as part of a healthy lifestyle and good decision-making process. The Substance Program also offers assistance to athletes concerning issues related to drug and alcohol abuse. Preventative measures used by the Athletics Department include drug screening combined with an alcohol and drug education program. Fresno State does not condone the use of street drugs, performance enhancing substances, including dietary supplements, and the inappropriate use of alcohol and prescription medicines. Also, in accordance with NCAA Bylaw 17.1.7, the use of tobacco products by student-athletes is prohibited during practice and competition.

The Athletics Department's definition of inappropriate use of alcohol by student-athletes includes, but is not limited to, the following: **underage drinking; regardless of age: drinking at any activity sponsored by the Athletics Department where they represent the institution, drinking while on trips for off-campus competition, consumption of alcohol prior to or during athletics practice or competition, public drunkenness, driving under the influence(DUI), and consumption of alcohol when hosting a prospective student-athlete on an official visit.** Any violations of University, city, county, state or federal laws also constitute violations of the Student-Athlete Code of Conduct.

The Athletics Department will use urine drug testing to help deter the use of banned substances as well as to help identify those student-athletes with drug and alcohol abuse problems. It is the policy of the Athletics Department to return to athletic participation those who are in compliance and to restrict from athletic participation those who are not.

The Substance Program is separate and distinct from the NCAA drug-testing program; student-athletes are responsible for both. This Substance Program policy may be amended as needed with proper notice to students-athletes.

I. EDUCATION AND SCREENING PROGRAM GOALS

- A. Educate student-athletes concerning the risks of using banned substances, including dietary supplements, and the inappropriate use of alcohol and prescription medicines.
- B. Provide reasonable safeguards to ensure the safety of every student-athlete who participates in athletic competition.
- C. Identify student-athletes who may be involved with substance or alcohol abuse.
- D. Encourage prompt education, counseling or treatment for student-athletes with substance or alcohol abuse problems.

II. PROGRAM IMPLEMENTATION

Any student-athlete on a Fresno State roster or on the NCAA squad list will be included in this program. This includes those athletes who have completed their eligibility and those eligible to use the academic center and the weights and conditioning facility. At least once each year, a presentation will be made to each team outlining and reviewing the Department's program and policy regarding drug screening, its purpose and its implementation. Prior to practice or competition each student will confirm in writing that she/he has received, read, and is willing to abide by the policy. Once each semester, student-athletes will attend educational sessions on dietary supplements, anabolic agents, street drugs, alcohol and tobacco.

III. DRUG SCREENING

Currently the Athletics Department conducts tests for street drugs such as amphetamines, cannabinoids (substance contained in marijuana), cocaine and other controlled substances. The department may also test for anabolic steroids and their precursors as well as other athletic performance-enhancing substances. These drugs may be present in nutritional supplements, and regardless of the source, it will be considered a positive drug test. Current information on ingredients that are banned by the NCAA and may be contained in nutritional supplements is available at www.drugfreesport.com/rec (the password is ncaa1). The department may test for any drug listed on the NCAA list of banned drug classes [Bylaw 31.2.3.1].

The NCAA banned drug classes list may be amended periodically by the NCAA committee with oversight for NCAA testing. To view the most current list, visit www.ncaa.org/health-safety.

A. Testing Guidelines

- 1. All Substance Program testing will be conducted through unannounced tests (i.e., coaches and students will not know testing dates in advance).

All student-athletes are subject to drug testing throughout the entire academic year; a random selection of 10% of student-athletes from each team will be tested on a monthly basis. Drug testing may also be done during the summer months.

2. Student-athletes may be selected for drug testing through several methods: team testing (all students on a given team), random selection, pre-season testing (prior to the first practice or competition), post-season testing (prior to post-season play), re-entry (after drug/alcohol treatment or suspension), follow-up (following a positive drug test), and reasonable suspicion.
3. Drug testing for reasonable suspicion may be based on objective information from a source deemed reliable by the Director of Athletics or his/her designee. This information may include: (a) observed possession of the banned substance(s), (b) arrest or conviction for a criminal offense related to the prohibited substance(s), and (c) observed abnormal appearance, conduct or behavior reasonably interpreted as being caused by the use of the substance(s) (e.g., dilated or constricted pupils, missing class or practice, lack of motivation, mood changes). If students are found to be in possession and/or using such substances, they will be subject to the same procedures that would be followed in the case of a positive urinalysis.
4. Post-season drug testing will be conducted with each team that is in a position to qualify for post-season competition. Positive results will count as positive tests in the Substance Program, and students will be immediately suspended in accordance with the suspension percentage designated in Section V of this policy.
5. Fifth-year athletes (those whose eligibility is exhausted) must comply with all elements of the program. Fifth-year students testing positive who are on post-eligibility athletic aid will not receive any additional athletic scholarship funding.
6. A no-show for a drug test counts as a positive.
7. Refusal by a student-athlete to take a drug test at the time it is requested will be treated as a positive test.
8. Any attempt to tamper with, manipulate, substitute or adulterate the urine specimen or the testing process will be considered as if it were a positive drug test result.
9. All positive drug test results will be cumulative throughout students' entire athletic careers while at Fresno State.
10. All student-athletes with a positive drug test(s) from the 2005-06 academic year will be considered to have one positive test at the beginning of the

2006-07 academic year. However, the mandatory 10% suspension as indicated in Section V of this policy will be waived. Those students will be drug tested monthly throughout the 2006-07 academic year because there are grounds for reasonable suspicion of their continued drug use.

B. Notification of Drug Testing

Once a month, during the academic year, 10% of the student-athletes from each team will be selected for drug testing. Names of student-athletes will be selected randomly in addition all student-athletes with previous positives within the year and those identified for reasonable suspicion will be tested. The list will be given to the Head Athletic Trainer the day before the drug test.

1. Head Athletic Trainer Notification

- a. The Head Athletic Trainer will review the list to determine if all athletes selected will be available.
- b. The Head Athletic Trainer will give the names to the athletic trainers responsible for that sport by 12:00 noon the day prior to the test.
- c. Once the athletic trainer receives the names, the athlete notification process can begin.

2. Athlete Notification

- a. Upon direct notification(no messages) by either the trainer or the coach, athletes will be required to report to their respective athletic training room to sign the Athlete Notification Form prior to 6 PM.
- b. The athlete will be told to report to the drug testing site at his/her scheduled time between 6:00 a.m. – 9:00 a.m the following morning.
- c. Athletes will be instructed to report in the appropriate attire, not to void prior to arrival, and to not be over-hydrated.
- d. All athletes are required to provide working phone numbers where they can be contacted in case they miss their assigned time.
- e. Failure to report will result in a positive drug test.

C. Collection Procedures

Athletes must report to the testing site dressed in appropriate athletic clothing (i.e., shorts, T-shirts, and sports bra for female athletes).

1. Athlete must wash and dry hands

- a. To assure the athlete does not have any chemicals on his/her hands, they must thoroughly wash and dry their hands prior to providing a specimen.
2. Selecting a collection cup and testing kit
 - a. The athlete must select a collection cup and testing kit from an approved supply. The cup and kit must remain in the sight of the collector at all times.
 - b. There must be a minimum of three (3) specimen collection cups and collection kits for the athlete to choose from.
3. Providing a specimen under observation
 - a. The observer must be the same sex as the athlete providing the specimen.
 - b. The observer must walk beside or behind the athlete so as not to let the collection cup and kit out of view.
 - c. The observer must have a clear view of the athlete while the specimen is being provided.
 - d. The athlete must remove his/her shirt prior to providing a sample.
 - e. The athlete must provide enough urine to fill the testing kit to 1/3 of its capacity.
 - f. The athlete must pour the specimen from the collection cup into the sample container, leaving a small amount in the sample container.
 - g. The athlete then seals the sample container tightly and carries both the collection cup and the sample container back to the processing table.
 - h. The sample container is then sealed with the security seal.
4. Testing specimen using a refractometer and pH dipstick
 - a. Testing specific gravity
 1. Specific gravity must be tested PRIOR to testing pH.
 2. Using the refractometer, check the specific gravity of the urine remaining in the sample cup.
 3. Record the findings in testing log. Specific gravity must be greater than 1.005.

4. Wipe glass prism dry with soft tissue between uses.
- b. Specific gravity out of range
 1. If specimen does not meet these criteria, it is processed and the athlete is required to provide an additional specimen under observation as identified above.
 2. The athlete should be encouraged not to hydrate during this time frame.
- c. Testing pH
 1. Using pH dipstick, check the pH of the urine remaining in the cup.
 2. Record findings in testing log.
 3. pH must be between 4.5 – 7.5.
- d. pH out of range
 1. If specimen does not meet these criteria, it is processed and the athlete is required to provide an additional specimen under observation as identified above.
5. Chain of custody forms
 - a. When the athlete brings the sample container to the processing table, it must be sealed.
 - b. The athlete then writes his/her initials on the top portion of the security seal.
 - c. The athlete must verify that the number on sample label matches the form identification number, and the athlete identification number. The athlete then signs the form.
 - d. The adhesive label is then removed from the chain of custody form and placed around the sample container.
 - e. The sample container is then sealed in the plastic pouch.
6. Storage and shipment of samples
 - a. Samples awaiting shipment are to be refrigerated and stored in a secure location with limited access.
 - b. Samples will be sent next day to Redwood Toxicology along with

white chain of custody forms.

IV. DISPOSITION OF THE RESULTS

A. Positive Tests

1. All test results will be given to the assigned team physician and the Head Athletic Trainer, who will give them to the Substance Program Coordinator. The Substance Program Coordinator will notify the Director of Athletics of any positive tests. If necessary, the Head Athletic Trainer will consult with the team physician to determine medical risk.
2. The team physician will provide a recommendation regarding the athlete's participation in practice and/or competition to the Substance Program Coordinator, who will inform the Director of Athletics. If tests indicate a potential medical risk because of the substance involved, the team physician will recommend to temporarily suspend the student-athlete until such time as there is no medical risk. The team physician is the sole authority on medical risk associated with participation.
3. The Substance Program Coordinator will inform the student-athlete, coach, and sport supervisor immediately of the positive test result.
4. As soon as possible following a positive drug test, the Substance Program Coordinator, head coach and sport supervisor will interview the student-athlete during a post-positive meeting. The Head Athletic Trainer and/or team physician will also be invited to the meeting.

V. CONSEQUENCES OF POSITIVE DRUG TESTS

Student-athletes who test positive on Substance Program drug tests must proceed through following consequences:

- A. First positive – The first positive drug test will result in suspension (i.e., will not play) in 10% of the total contests for that season, including post-season play. The suspension starts immediately following the positive result and continues until 10% of the contests have been played. The number of dates of competition will be rounded to the nearest whole number. Suspension is from competition only. Students are allowed to practice and participate in all other team activities, except they will not be part of any team activities on a competition day.

Students testing positive for the first time are also required to: (1) schedule a chemical dependency assessment within 48 hours of the post-positive meeting, (2) complete the assessment as soon as scheduling permits, (3) complete an education program as defined by the Substance Program

Coordinator within seven days of the post-positive meeting, (4) attend 4 (four) 12 Step meetings within 14 days of the post-positive meeting, and (4) participate in a post-program interview upon the completion of the required assessment and drug education. The students' parents may also be notified of the positive drug test.

Students will be drug tested monthly following a first positive. At the end of the suspension period and before the student resumes full participation on the team, a re-entry drug test will be conducted. Any positive test results will be considered a second positive in the Substance Program.

- B. Second positive – The second positive drug test will result in suspension (i.e., will not play) in 20% of the total contests for that season, including post-season play. The suspension starts immediately following the positive and continues until 20% of the contests have been played. This is a program suspension from all team activities, including practice. However, students may continue to participate in the team academic programs, and weight room use is allowed as long as it is not with the team.

Students will be drug tested monthly following a second positive. At the end of the suspension period and before the student resumes full participation on the team, a re-entry drug test will be conducted. Any positive test results will be considered a third positive in the Substance Program.

- C. Third positive – The third positive drug test will result in permanent dismissal from the team.

The student-athlete may only petition the Director of Athletics if unusual or mitigating circumstances warrant deferment of the suspension or assignment of alternate consequences. When positive tests which result in loss of playing time occur toward the end of the sport season, the suspension will continue into the next sport season until the percentage of playing time loss is fulfilled.

VI. ASSESSMENT, EDUCATION, TREATMENT, AFTERCARE and SAFE HARBOR

A. Assessment

All assessment, education, counseling, treatment, aftercare, and Safe Harbor services with outside providers must have the prior approval of the Substance Program Coordinator and the team physician.

1. An appointment for a chemical dependency assessment will be made with the treatment administrator within 48 hours of the post-positive interview.
2. The student-athlete must follow through with completing the assessment as soon as scheduling permits. If the student fails to do this, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 20% of the total contests for that season, including post-season play.

3. The treatment administrator recommends a plan for the appropriate program for the student-athlete, based on the information contained in the assessment.
4. The plan is shared with the team physician and the Substance Program Coordinator.
5. The student-athlete will meet for a post-assessment interview with the Substance Program Coordinator, Head Athletic Trainer and coach to discuss the specific plan.
6. The student-athlete will be drug tested monthly during the following calendar year. If the student does not have any positive drug tests within that calendar year, he/she will be removed from monthly testing, and his/her name will return to the selection pool for random drug testing. This same drug testing schedule following a first positive will also be repeated after a second positive drug test.

B. Education Program

1. The education program usually consists of a computer program, corresponding paper, and 4 (four) 12 Step meetings which focus on education as a means to prevent future drug use. If the student-athlete fails to complete the computer program and paper within 7 (seven) days of the post-assessment interview, or if the student fails to complete the four 12 Step meetings within 14 days of the post-positive interview, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 20% of the total contests for that season, including post-season play. Other sanctions will apply as indicated in Section V of this policy.

An alternate education program may be recommended by the treatment administrator and/or team physician based on the type of substance use and/or the results of the chemical dependency assessment. If so, the Substance Program Coordinator will determine the length of time allowed for completion. The maximum time allowed for completion will be 3 (three) weeks. If the student fails to complete the alternate education within the time specified, it is considered a second positive drug test, and the student will be suspended (i.e., will not play) in 20% of the total contests for that season, including post-season play. Other sanctions will apply as indicated in Section V of this policy.

2. After completing the assessment and education program, the student is required to participate in a post-program interview with the Substance Program Coordinator or his/her designee.
3. Additionally Coaches may impose their own consequences but only if they are more restrictive and included within a written set of team rules signed by the

team members. Consequences which include restrictions or cancellation of scholarships require the concurrence of the Director of Athletics.

C. Treatment Program

Treatment is available upon the written request of the student-athlete, head coach, team physician, or athletic administrator. Requests will be made to the Substance Program Coordinator and can occur before a student tests positive and after a first or second positive drug test. The treatment program usually consists of, at a minimum, a 12-week program designed to use a variety of techniques as a means to accomplish secondary prevention success.

1. The treatment administrator will report progress and consult with the team physician and the Substance Program Coordinator.
2. Any violation of the treatment program (including a positive(nondecreasing) test, failure to attend counseling sessions and/or educational classes as scheduled, not completing outside assignments, e.g., attending 12 Step meetings in the community) will be reported to the Substance Program Coordinator.
3. Decisions regarding the student-athletes' ability to continue to practice and/or compete are contingent on the confidential recommendations from the treatment administrator with input from the team physician, consultation with the head coach and the approval of the Director of Athletics. During treatment student-athletes will be required to:
 - a) Sign a comprehensive contract (treatment plan) that stipulates conditions for eligibility for competition and/or practice.
 - b) Submit to periodic drug testing as required by the treatment facility. Drug treatment participation will provide a Safe Harbor from regular Substance Program drug testing for a period of 45 days, but only if drug testing during that time indicates decreased use. If test results do not indicate decreased use, it will be considered a positive drug test within the Substance Program, and students will be subject to the sanctions indicated in Section V of this policy.
4. Once students are no longer in a treatment program, whether by noncompliance, dismissal or successful completion, they will be drug tested monthly.
5. Athletic Department funding for a drug treatment program can only occur one time. If students want to enter a second program, or want to enter the same program for a second time, they are responsible for payments.

D. Aftercare

Upon completion of treatment, student-athletes will enter the aftercare phase, which may last 3 to 6 months, and will again be tested for drugs on a monthly basis through the Substance Program.

E. Safe Harbor

Safe Harbor refers to a period of time in which a student is participating in a treatment program when positive drug tests do not count as positives within the Substance Program, as long as those test results indicate decreased drug use.

1. Athletic Department funding for a Safe Harbor program can only occur one time. If students want to enter a second program, or want to enter the same program for a second time, they are responsible for payments.
2. Voluntary referrals into a Safe Harbor program may occur prior to a student testing positive. A voluntary referral at the time of testing is not considered voluntary.
3. The Safe Harbor program will last for a maximum time period of 45 days.
4. Upon entry into the Safe Harbor program, the student will be drug tested immediately to establish a base line of the substance being used.
5. Students will be drug tested while in the Safe Harbor program. If test results do not indicate decreased use, or if the student is noncompliant with the program requirements, he/she will be removed from the program and sanctions consistent with a second positive drug test will be applied (see Section V).
6. If the Safe Harbor treatment program extends beyond a 45-day period, any positive drug tests after those 45 days will be considered a positive within the Substance Program.
7. Students who successfully complete a Safe Harbor program will be returned to the random pool of athletes for further selection, but no sanctions are applied at that time.

VII. VOLUNTARY AND OTHER REFERRALS

- A. A student-athlete who comes forward voluntarily (or is referred by other means) and acknowledges a problem with drug abuse shall be afforded the support and resources available to address the problem. The student-athlete

will undergo a chemical dependency assessment, as scheduled by the Substance Program Coordinator and will be referred to the appropriate support services, which may include a treatment or Safe Harbor program. A self-referral at the time of testing is not considered voluntary.

- B. The referral, assessment, diagnosis and treatment resources of the Substance Program are available to all coaches and student-athletes to assist with current and pre-existing conditions and circumstances. These circumstances include, but are not limited to, alcohol/drug abuse and antisocial behavior.

VIII. STUDENT-ATHLETES' RIGHTS

- A. At any time the student-athlete has the right to be assisted and/or represented by a person of his or her choice, but it may not be an attorney.
- B. Student-athletes may voluntarily contact the Substance Program Coordinator, Head Athletic Trainer, team physician or sport supervisor at any time for personal, emotional or drug-related problems so that solutions may be found before their academic or athletic performance is affected. Any such concerns will be kept strictly confidential.
- C. Approval for a second opinion regarding a student-athlete's assessment may be granted with pre-approval of the Substance Program Coordinator and team physician. Payment for the second assessment will be the responsibility of the student-athlete.
- D. Each student-athlete has the right to appeal any consequences imposed by this Substance Program policy. Requests for appeals are submitted in writing to the Substance Program Coordinator. Any appeal must be in writing to the Director of Athletics and have a substantive or very unusual basis. The Director of Athletics will determine if an in-person meeting is needed. Any further appeal will be heard by a committee consisting of members of the Athletic Advisory Council, Faculty Athletic Representative and Coordinator of the Substance Program (non-voting). Students must fulfill the consequences delineated in Section V of this policy until an appeal decision is rendered.

IX. COACHES' ROLE

It is the responsibility of the head coach to ensure that their student-athletes follow through with all responsibilities regarding the testing and education provided by the Substance Program.

Each head coach may also have team rules regarding alcohol and drug use that are separate from the NCAA or Substance Program rules. These rules must be in writing and signed off by team members. Coaches have the right to be more restrictive

than these Substance Program guidelines in implementing their team rules and any penalties will be in addition to the SAAP penalties.

X. VIOLATION OF STATE OR FEDERAL LAW

Any criminal violation of state or federal laws involving the possession or sale of any drugs or illegal substances by student-athletes will be dealt with using the procedures outlined in the Student-Athlete Code of Conduct. This includes alcohol violations.

Sport _____

**FRESNO STATE
DEPARTMENT OF INTERCOLLEGIATE ATHLETICS
CONSENT TO PARTICIPATE IN THE
SUBSTANCE ABUSE PROGRAM
AND LIMITED WAIVER OF CONFIDENTIALITY**

I, _____, a student of California State University, Fresno, as a condition to participating in the Intercollegiate Athletic program conducted under the auspices to the California State University, Fresno Athletic Corporation, Inc., do hereby consent to participate in the Substance Abuse Program (hereafter "Program"). I acknowledge that I have received, read and understand the policy statement concerning this Program which includes provisions for testing for the presence of substances and for education and counseling with regard to substance abuse, and disciplinary sanctions which might be imposed if it is determined that I have violated the provisions and intent of the Program. I hereby consent to having samples of my urine tested for the presence of those drugs or other substances identified in the Program at such times as urinalysis tests are required under the Program. I understand that I may choose not to sign this Form and forego participation in intercollegiate athletics at Fresno State.

Further, I understand that as a part of the Program, the results of this testing may be disclosed to the team physician, athletic director, the coaching staff, Substance Program Coordinator, Head Athletic Trainer, sports supervisor, Substance Program Committee members, and with proper consent, to my parent(s) or legal guardian(s) as provided for in the Program. I also understand that my participation in intercollegiate athletics is conditioned upon my full and good faith participation and cooperation in all aspects of the Program including testing and education and, upon request, counseling and rehabilitation.

To the extent that disclosures are necessary pursuant to the provisions of the Program, I further authorize the release of information under the Family Education and Privacy Act (20 U.S.C. Section 1232(g)), the physician-patient privilege, and any state laws or University policies. It is understood that the information will not be available to any other person without first obtaining my consent. I also hereby release the University, Athletic Corporation and all of their Trustees, Directors, officers, employees and agents from legal responsibility or liability for the release of such information and records as authorized by this Form.
