Dear Ms. Villa:

Thank you for your letter of Aug. 15 and the documents concerning drug testing at Texas-El Paso. I have some questions and clarifications.

Does UTEP routinely screen for performance-enhancing drugs and masking agents as part of its regular and random testing?

In the information you supplied, there is a spreadsheet entry for November 30, 2005, showing \$868 was spent on five tests. Did those five tests include screenings for performance-enhancers? Please tell me what banned substances were used by the three athletes who tested positive on that date.

Thank you for your assistance.

Sincerely,

Nate Carlisle
